

ORDER OF THE EASTERN STAR

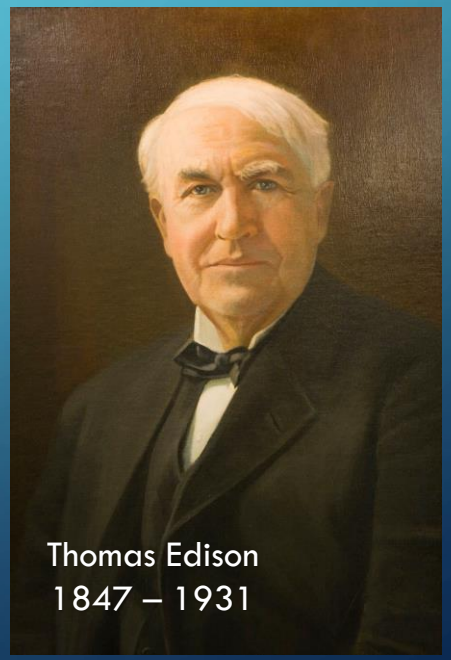

HUMAN GENERATOR

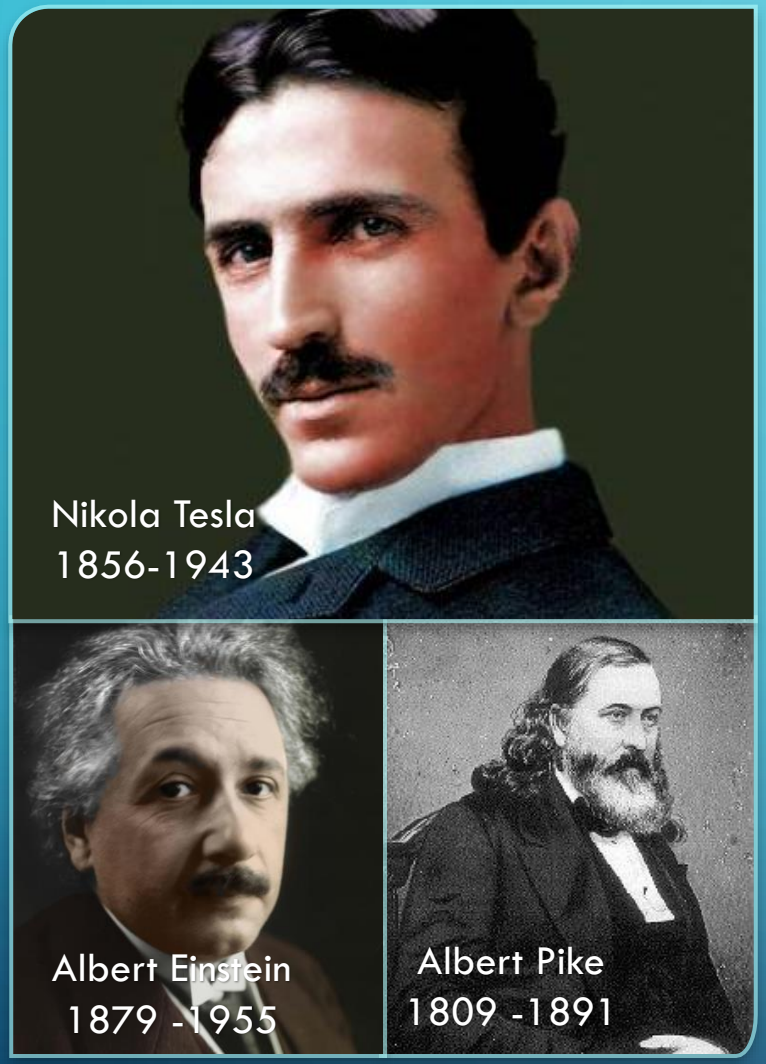

ROB MORRIS INFLUENCES OF HIS TIME.

- Rob Morris was born 1818 and died 1888 in his life he lived in the most astonishing times and influences:

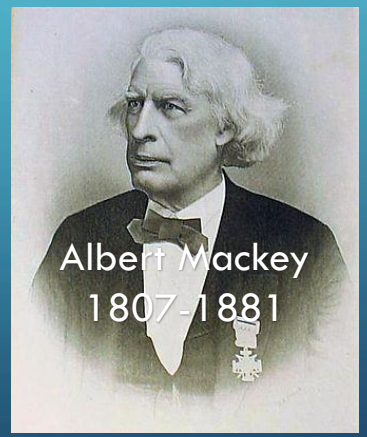

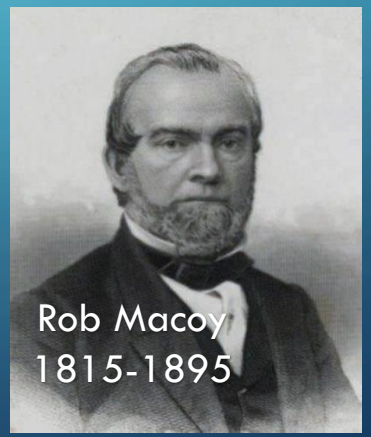

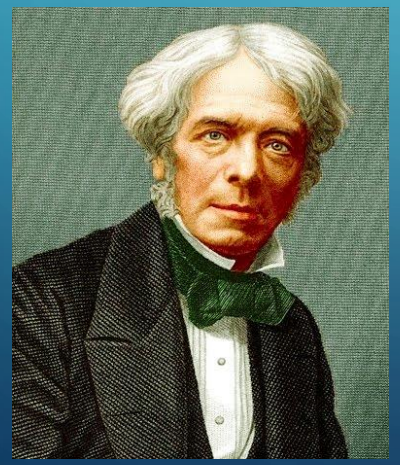

THESE INDIVIDUALS SHARED MUCH IN COMMON

AND INFLUENCED THE WORLD DURING THE IRON AGE.

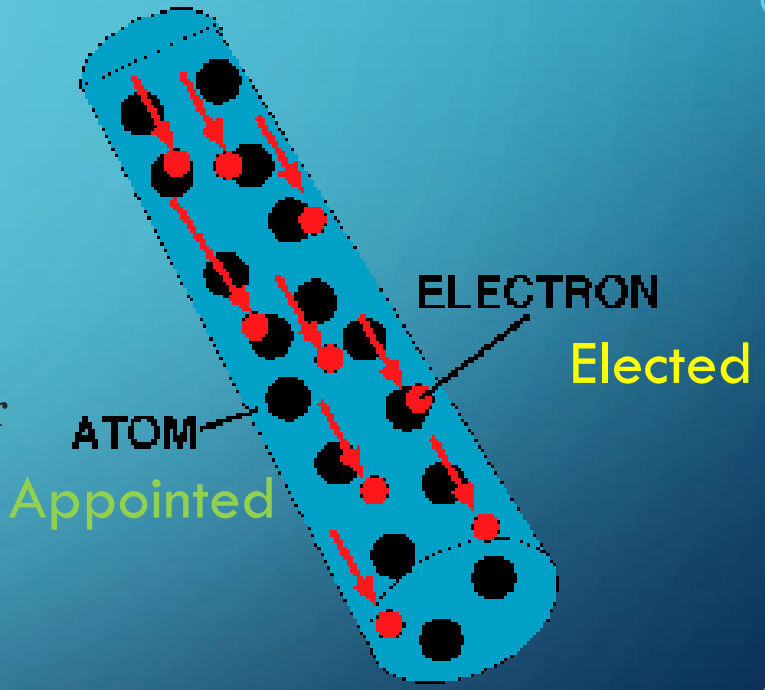

In 1831 electricity became viable for use in technology when Michael Faraday created the electric dynamo (a crude power generator), which solved the problem of generating electric current in an ongoing and practical way. Faraday's rather crude invention used a magnet that was moved inside a coil of copper wire, creating a tiny electric current that flowed through the wire. This opened the door to American Thomas Edison and British scientist Joseph Swan who each invented the incandescent filament light bulb in their respective countries in about 1878. Previously, light bulbs had been invented by others, but the incandescent bulb was the first practical bulb that would light for hours on end.

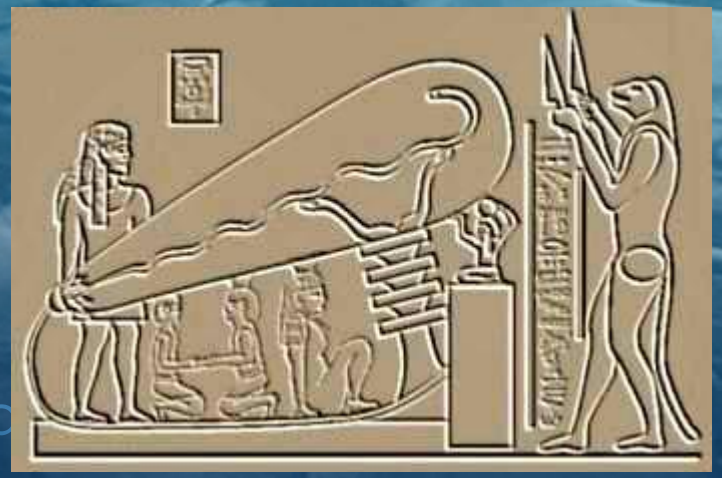

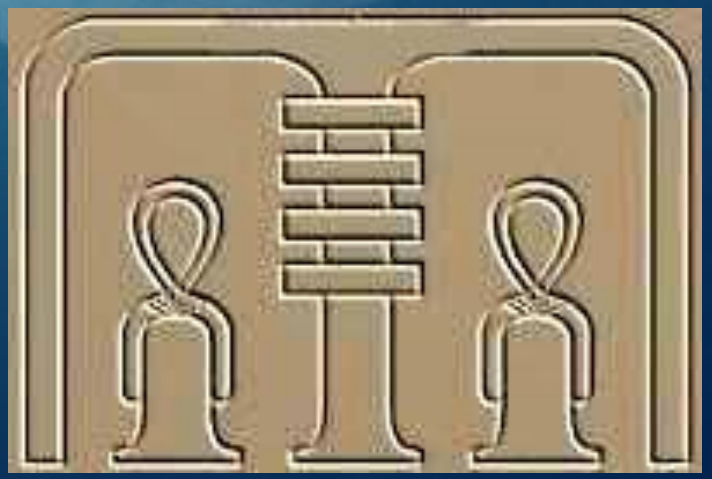

Michael Faraday
1791-1867

Electricity is a form of energy. Electricity is the flow of electrons. All matter is made up of atoms, and an atom has a center, called a nucleus. The nucleus contains positively charged particles called protons and uncharged particles called neutrons. The nucleus of an atom is surrounded by negatively charged particles called electrons. The negative charge of an electron is equal to the positive charge of a proton, and the number of electrons in an atom is usually equal to the number of protons. When the balancing force between protons and electrons is upset by an outside force, an atom may gain or lose an electron. When electrons are "lost" from an atom, the free movement of these electrons constitutes an electric current.

Rob Morris Traveled to The Orient And upon his return he wrote the Rosary of The Eastern Star. These influences I believe Rob Morris understood Human Energy

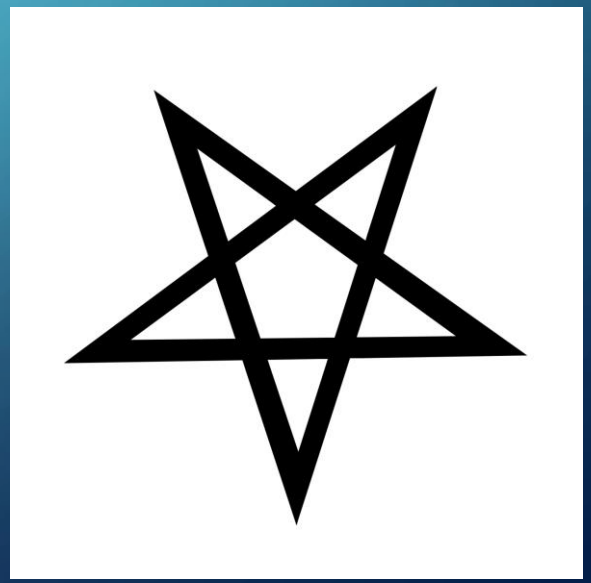

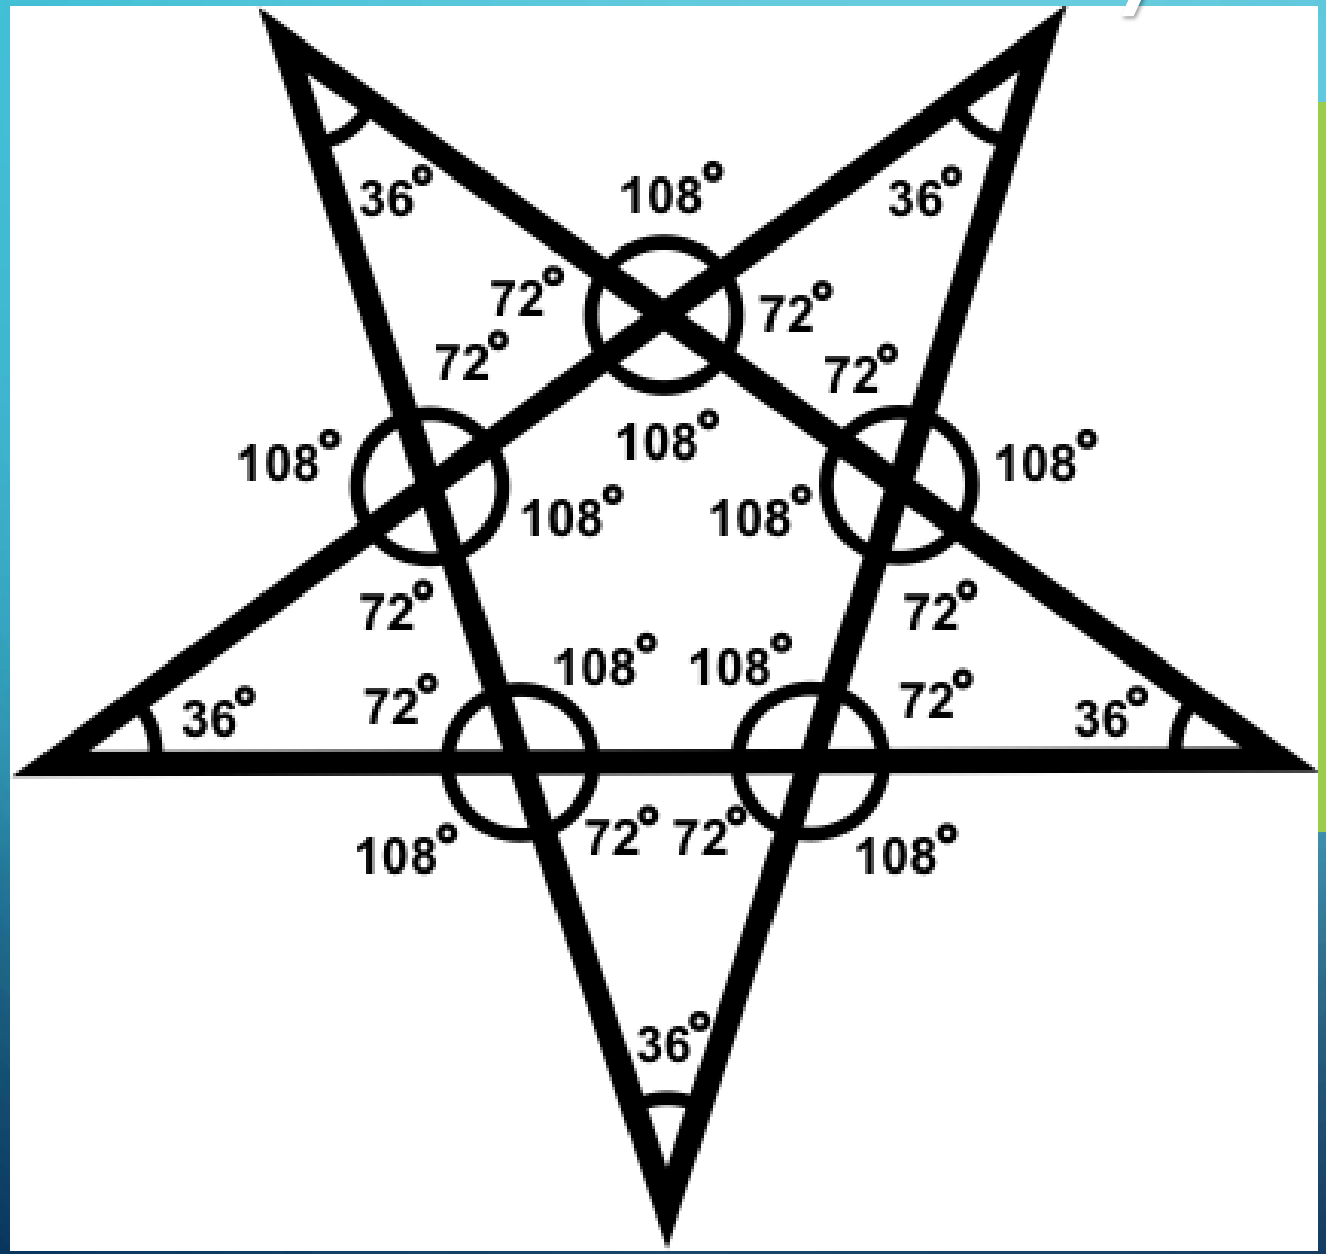

Page 217 In 1858, the M. P. Grand M. Alfred Creigh reported a manual, which was adopted by the Grand Council as the true work of Cryptic Masonry. June 10, 1863.—The Grand Council of Royal and Select Masters held its seventeenth annual Assembly, in Greensburg, Westmoreland County, Penna., sixteen Councils being represented. M. P. Grand Master Creigh submitted an interesting correspondence between Illustrious Companion E. B. Moore, Chairman of the Committee on Foreign Correspondence of the Grand Council of Massachusetts, and himself, on the subject of incorporating the degree of Super Excellent Master as a regular degree of Cryptic Masonry

The Grand Master was instructed to continue the correspondence as being calculated to elicit much valuable information on Cryptic Masonry. The M. P. Grand Master Creigh, in his annual address, suggested the propriety of dividing the State of Pennsylvania into nine districts, over each of which districts three **Ghiblimites** should be appointed, whose duty it shall be to make themselves acquainted with the mysteries of the S. V., and impart instruction in our rites and ceremonies to the Councils in their respective arches—these arches never to be increased or diminished—but shall always be com posed of the mysterious number nine—hence the full number of Ghiblimites scattered throughout the State, to assist the Grand Officers in the diffusion of our sublime principles, would be limited to the mystic number twenty-seven.

Page 218 PENNY—PERFECT. This important question was postponed until the next annual assembly, for the consideration of the Grand Council, when it was adopted. Penny.—A Roman coin. It was the hire of a laborer for a day's work. Reference is made to it in the Mark degree. Pentalpha.—A double interlacing triangle in which the name of God is placed, form a symbol in the masonic system. The early Christians used it to denote the God- Man, or the two natures of God, i.e. man and woman . It is formed in this manner,.

Parts of Rob Morris Poem We meet upon the Level we part upon the square.

"Let us meet upon the level, then, while laboring patient here, —
Let us meet and let us labor, tho' the labor seem severe.
Already in the western sky the signs bid us prepare
To gather up our working tools and part upon the square!

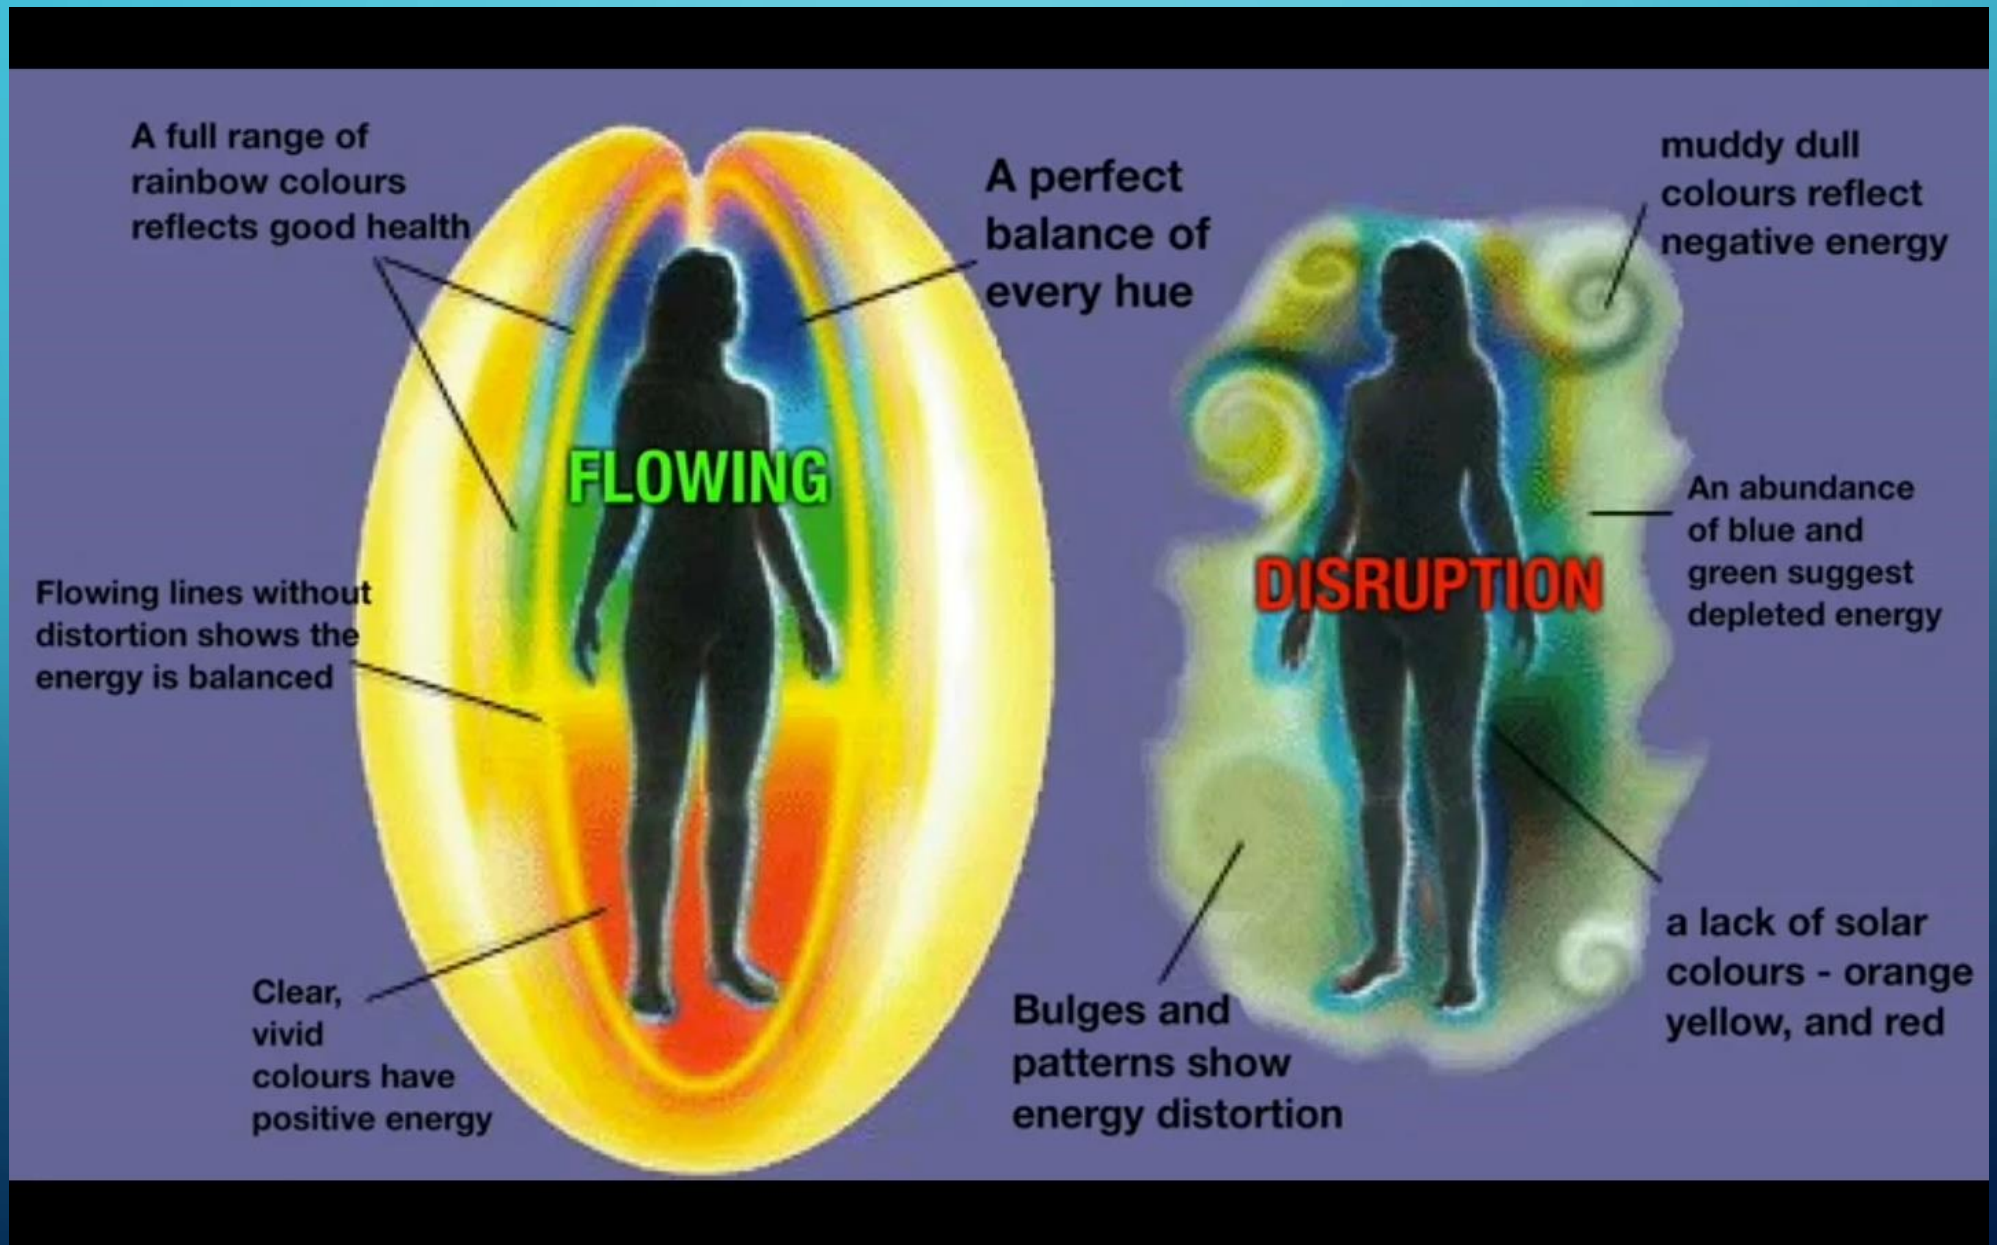

Hands round, ye faithful Ghiblimites, the bright, fraternal chain;
We part upon the square below to meet in Heaven again.
O what words of precious meaning those words Masonic are, —
We Meet Upon The Level, And We Part Upon The Square."

The **Ghiblimites** were expert operative Masons, who understood the science of **geometrical** proportion in its practical applications and were cemented in their lodges by the morality of its detached and component parts.

MEET THE REAL YOU

MEET OUR CURRENT CONDITION

ROB MORRIS AND THE DISCOVERIES OF THE TIME BROUGHT THE ANCIENT AND EASTERN CULTURES CLOSER TOGETHER. IN THAT, ROB MORRIS AND ROB MACOY COLLABORATED TO USE THE DISCOVERIES OF THEIR TIMES AND BRING AWARENESS BY COMBINING THE MASONIC RITUALS AND ANCIENT DISCOVERIES INTO A COMPLETE SYSTEM WHERE ONE CAN IMPROVE HEALTH EXPAND THE MIND AND ALIGN AN INDIVIDUAL WITH THEIR CREATOR.

ELECTRICITY BEING DISCOVERED IN ALL THESE GIANTS TIME FRAME – THE HUMAN EFFECT HAD TO BE RESEARCHED, UNDERSTOOD AND USEFUL.

Human Generator

Discovered by and illustrated by Jeffrey Starke, PP. OES

Mandarin Chapter # 292 Jacksonville, Florida

January 3, 2018

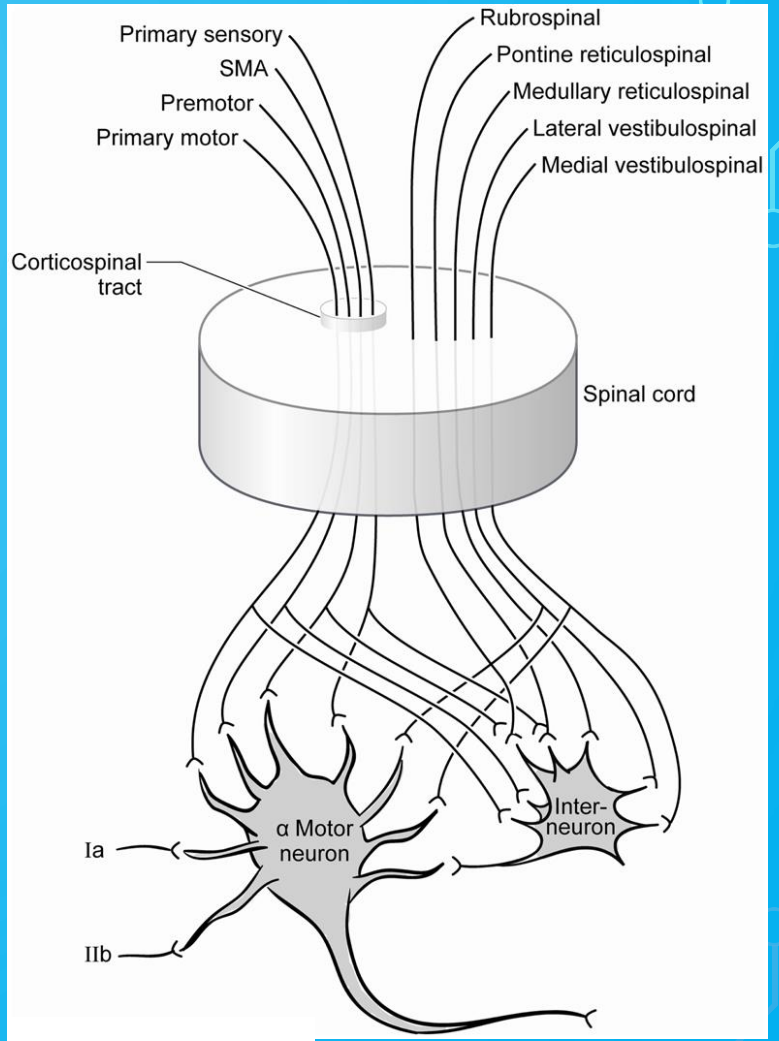

Humans generate energy by the use of stored magnetic fields this energy when in motion transfers charges and exchanges fields. while a **motor** does the opposite - it converts electrical energy into mechanical energy. Both devices work because of electromagnetic induction, which is when a voltage is induced by a changing magnetic field.

Thus we express the Frequencies cycles generation after Generations.

Human Energy, a means by which the Human race can access and travel life's journey happy, healthy and in synchronization with Trinity. By understanding and utilizing the methods and magnetic fields, Rob Morris designed a human generator at a time in our history when all the great minds which are recognized today, as the pioneers of technology, a time when electricity was first being discovered and harnessed.

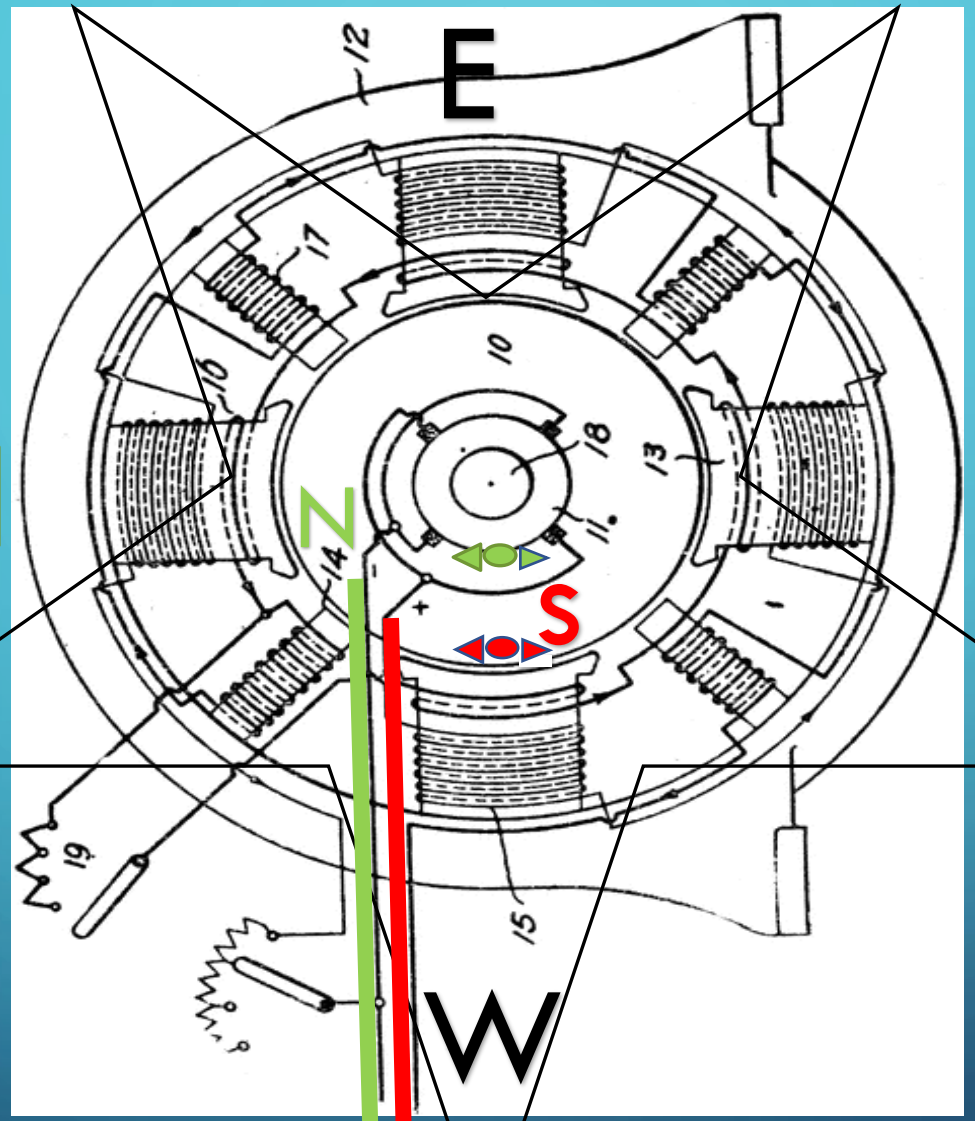

Words and Symbols create electro-chemical processes within the nerotransmitters that thought is even possible. While we searched the heavens for the Golden Key in the Lions Mouth by the Strong grip of the Lions Paw from the Tribe of Juda. Believing it was in the constellations the ancients embedded in us to discover, it really was within our inner world. It was the means by which ancients passed lore of how our bodies are connected to and mimic the signals coming from the GAOTU.

E T + ○ △

The Chaplin and the Marshall enter the core (Altar) inserting their human energy once charged the Elected/Appointed enter the
Chapter room as electrons and atoms do. Passing both north then south through the Conductor brushes stimulating the Electrons and Atoms to open the star field.

In order to begin a generator you must insert
a flow of energy to the core (Altar) of opposing charges

Star wired

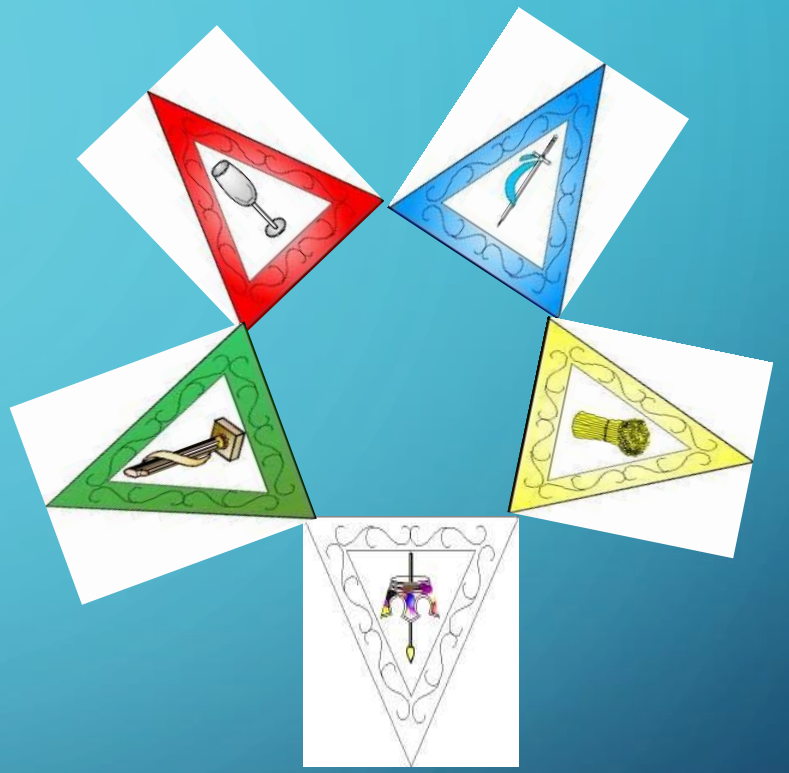

Delta wired

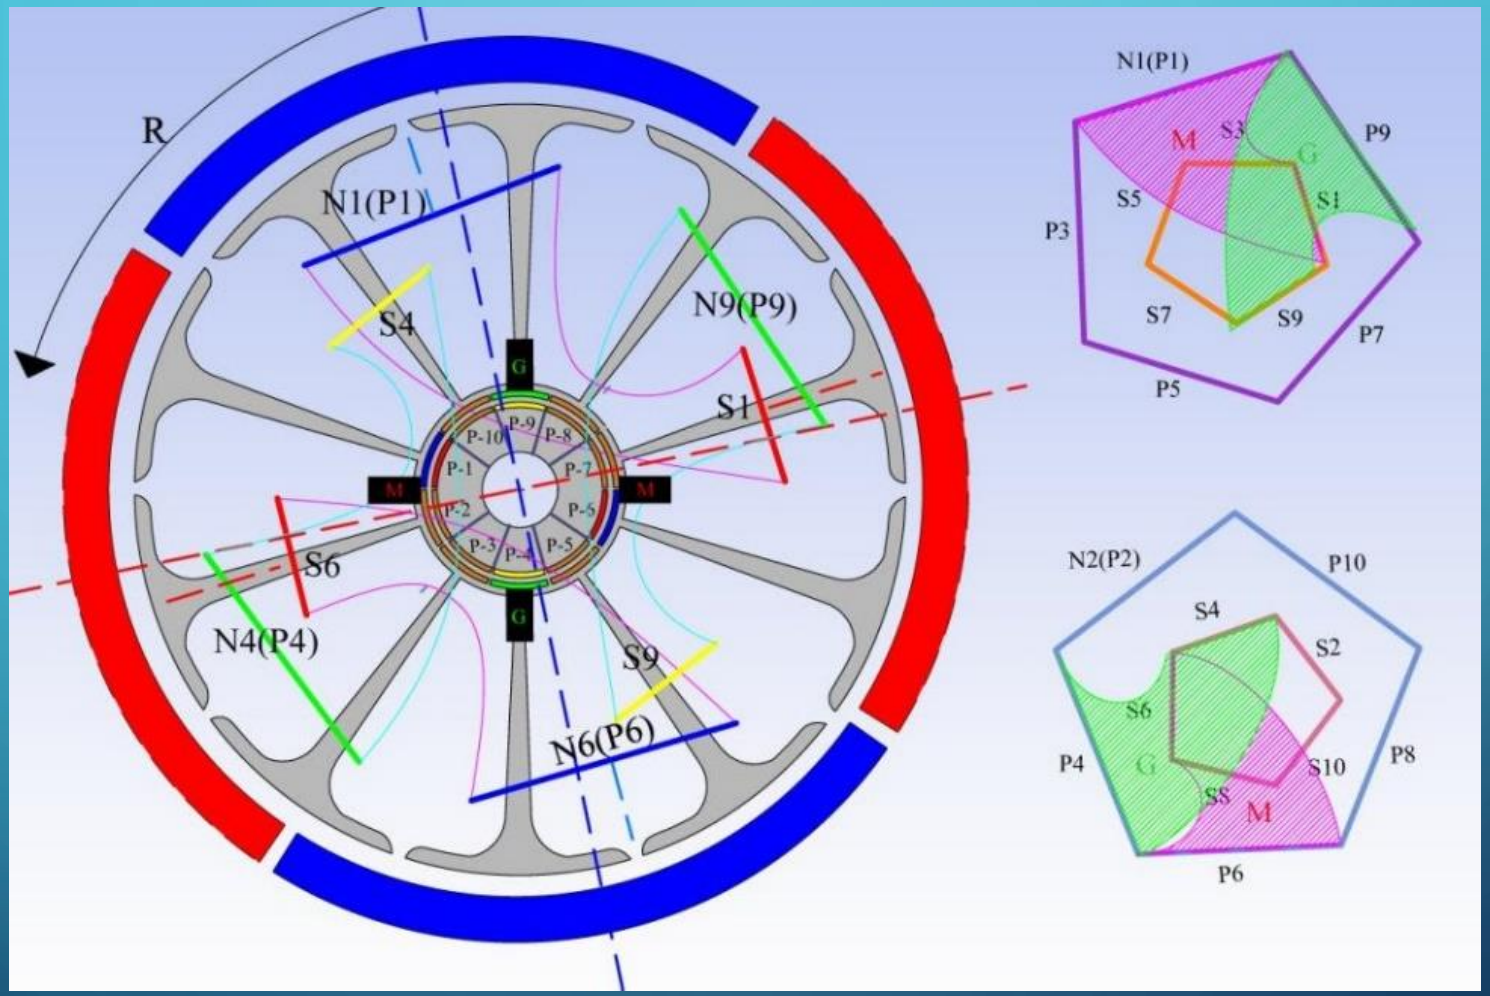

Outside Field - Emblems within a star

Inside Field - Emblems within a Delta Triangle

Once the energy is established by the passing of Elected to Appointed officers are exchanged and energy generated the inner field is established and the outer field charged. By this, we can now go from inside to outside energy of light and frequency. This action then causes what is called in engineering profession a Quadrature Field of energy. Where the energy comes from any number of the five frequencies within the core. Meaning the five Heroines. Whose colors represent the five-primary chukkas of the lower body. Which are directly related to the light within Trinity. (3 as 1) The quadrature field is within the four parts of the circle. And influences can and will be varied. You now observe where the Pentagon shape came from within the Star

WINDING THE LABRYTH

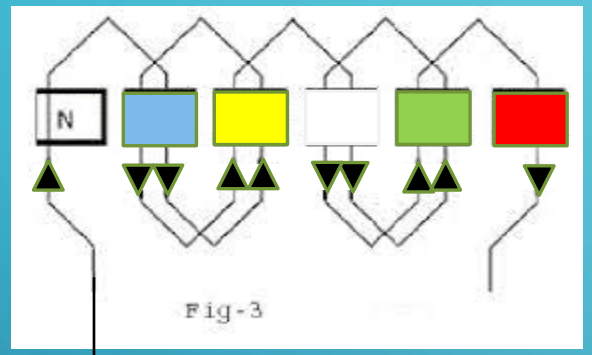

It was discovered as far back as Ancient times that the Magi (magnetic Fields) influenced and carried within and out of it the secrets of the Great architect of the Universe. In Eastern Star, as in electrical engineering. The number of windings and the number of Bobbins wound depict the value of the out put of energy from the delta to the star wave. This process is specific in nature and fundamental to nature in how it thinks and is. By winding the first of five windings, in one loop and direction then leaving to the next bobbin by looping to the next winding series within the bobbin, before going to the next bobbin, till all five are looped and wired. Is critical to the ability of creating electrical energy as well as, human energy. One error in this process can cause no energy to be received or transmitted. Thus, the Five heroines are the greatest of importance and energy.

Science discovered early on, that, by winding the Labyrinth of a generator did improve on the performance of the electrons (Elective) and allowed for filtering and cleaning light energy within the Delta Wave. Thus, this process, made for the entry of new electrons /Atoms Elected/Appointed to be wound in a matter in keeping with the GAOTU. We wind the candidate to make them influenced and excited Atoms by mimicking the same process using human energy. Meaning a Conductor.

Human Conductivity

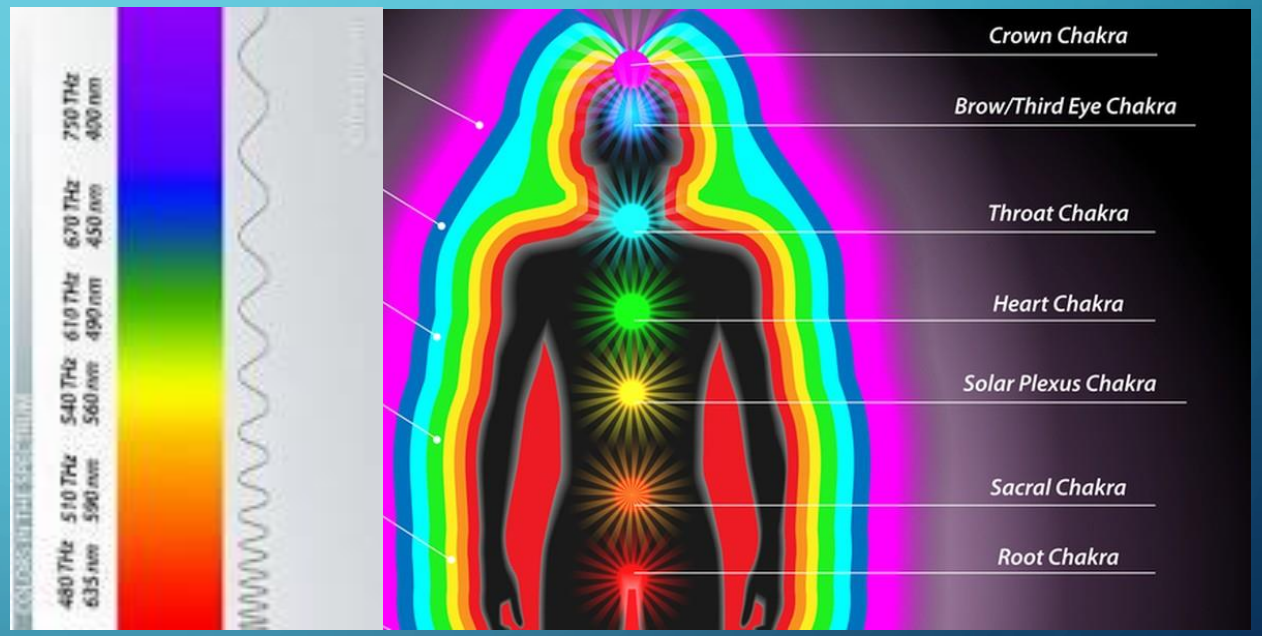

Nature is built and influenced by the Magi (Magnetic Force) streaming from Trinity . An East and West Star pulsating from North to South 432 times a second a.k.a. 432 Hertz. Captured IN THE CENTER BETWEEN THEM, Light was generated, and this light known as Sagittarius “A” Star is a radio star emitting light waves. This frequency attracts or repulses electrons and atoms. Our Bodies were built from these minerals and metals and pass through us to the core of our planet.

Every move you make, every step you take , every turn reorients and aligns your charkas. Which is the core of your energy light system we all are made from. It is inescapable. When we meet one another’s energy field the light we emit is seen by our body’s sensors. And we read the light of another rather than by speech and words. By placing our selves in various locations as well as positions we emanate energy reactive to these changes.

When we meet different energy fields or influences our Chukars become disoriented and our flow drops generating weaker energy fields. When our thoughts are virtuous within our body's flow emits a white light that can with training be seen by others. Breathing is essential to generating the light. This light when we become proficient in our memorizations and movements in the Star field we emit a hue of white light, people that see this light, see an arch of light emitting from the right and left shoulders we call wings. As in ancient days they were referred to as Angles.

Rituals written and memorized creates stimulation of Chakras Through the writing, designed to proper breathe to increase one's energy Improving Memory and cell strength.

Pictured above: the light wave generated up and down as we breathe. Words written; music played stimulate the heart Chukar. a.k.a., "The Emerald Tablet." Where oxygen molecules increase brain activity for thoughts. Kind of like how an accordion music instrument uses a lung to generate sound frequencies.

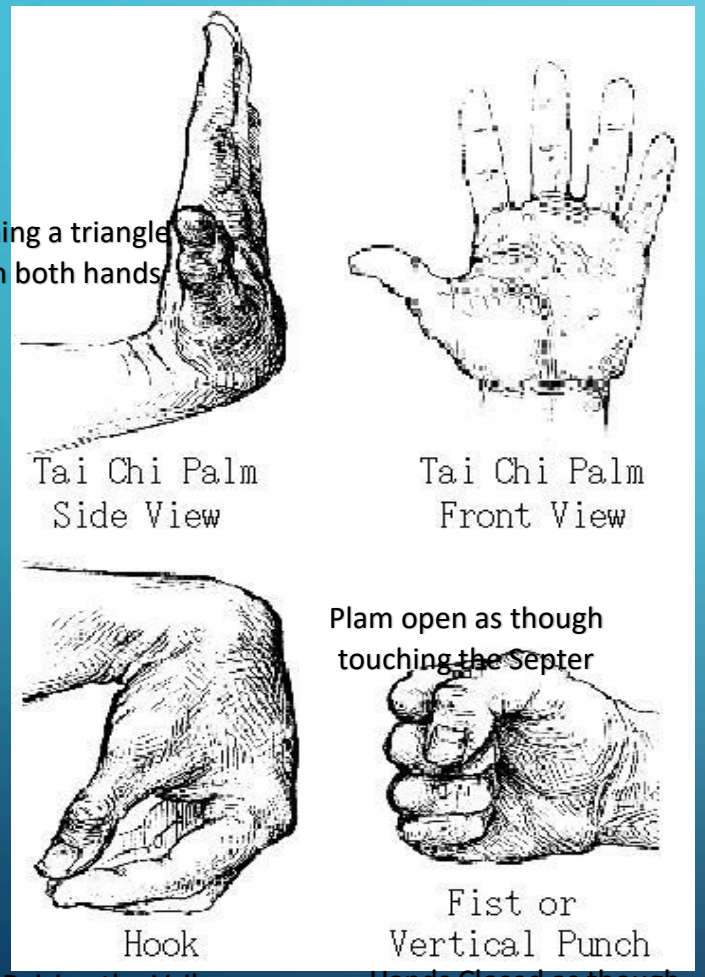

Our brains sections communicate on these frequencies and receive the light and are receiving from the 7 major body parts to the seven centers of our brain in unison generated by Trinity and influenced by our magnetic orientation we are exposed to in that moment. Proper Breathing increase and magnifies our energy in thought and light.

Rob Morris realized that the Female circuit and the Male circuit differed and realized that with proper breathing movements and hand gestures that the colors we see optically would improve and bring into Trinity's influence, that together, harmony would prevail. The rituals were written in such ways to cause us to breathe while we were in motion. And that our memorization would stimulate us from thinking our thoughts with the brain to now thinking with our Hearts. This dual action is in concert with the east and west Star of Trinity and is influenced by the passing between North to South.

Rob Morris discoveries which led to him writing the Easter Star Rituals was in-line to Trinity and explains how The GAOTU thinks and is, by what we can see and experience of it. The Tai -Chi movements discover by the Chinese along with the knowledge gain within from its practice, influenced Rob Morris to incorporate the Tai Chi Moments into the Ritual to insure the body was properly aligned and by speaking and breathing properly the candidate will receive the proper light /knowledge from the Heroine. ADA, Ruth, Ester, Martha, and Elekta. whom Wear white dresses with the color visible of the chukar that emits those virtues from within. Along with the candidate receiving the written ritual from the heroine, who's attentive ear hears the sounds from the instructive tongue and the Mysteries of OES are deposited in the repository of the faithful Breast. (Green Charka) The heart. Each movement and sign were designed based on its location within the inner field.

Duality of the Trinity influence brings forth the orients Ying and Yang Teachings.

Raising the Vail

Hands Closed as though holding colmbs of Barley

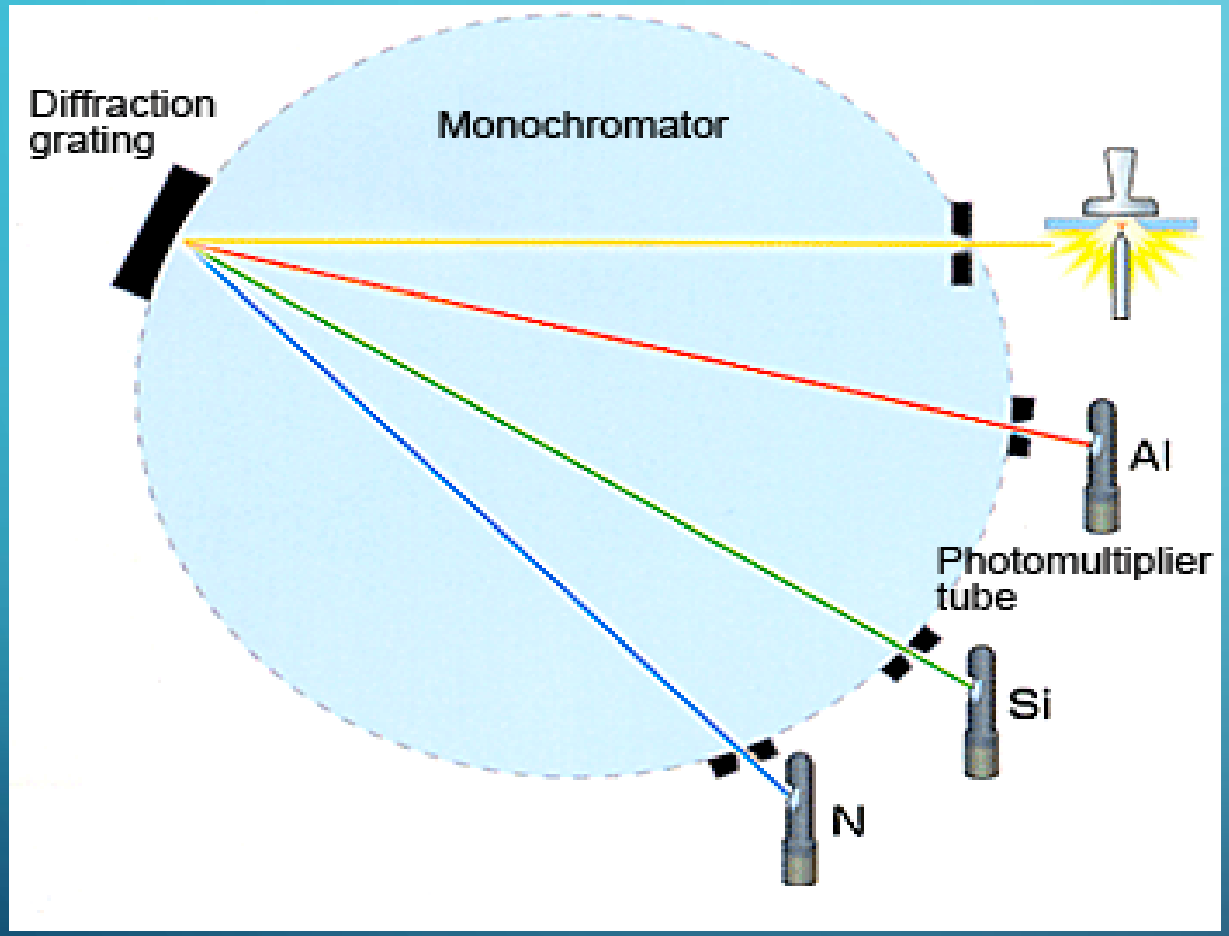

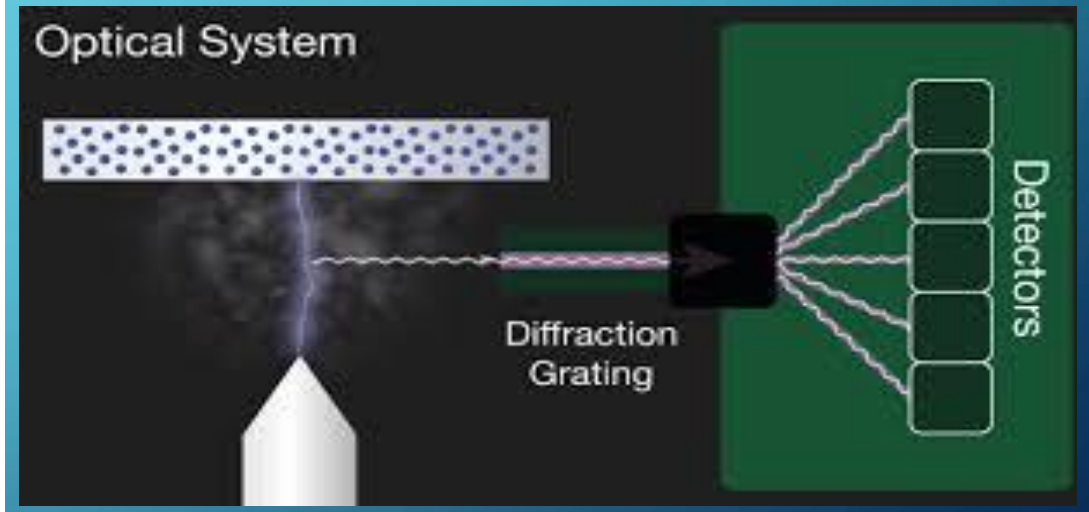

OES - Optical Emission Spectrometry

Rob Morris Knew that colors stimulated and interacted within the same light frequencies that govern the body and its energy, muscles, memory, nerotransmitters and when used properly good healthy mind and body. Today, Modern sciences patented these ancient discoveries and call it their inventions and discoveries keeping them from people in order to use it to manipulate your mind and body to their favor.

Masonry and its Adaptive Masonry allied and appendant bodies, have known this for hundreds if not thousands of years of practice. Our eyes look through a layer of water that light passes through and receives the various frequencies to gather or expend energy.

Rob Morris uses the Blue ray, and Yellow ray, White Ray, Green Ray and Red ray to organize and introduce the alignment of the body to best work and best agree. By ritual open and closes of Chapters and proficiency in practice of these movements, forms, sounds, and light to introduce and align others in giving them the same realignment to be and govern goodness. The Heroines wear white dresses so when the Ray of light is called upon others see its hues and optically are excited in the realm within the body.

The Opening and Closing of the chapter by Rob Morris, is simply put, turn on and off human energy. The officers are Elected and Appointed. (Electrons/ Atoms) they enter the chapter room separated and aligned North to south respectively and take their respective stations as Electrons and Atoms do when the switch to open enters traveling down wires to their respective stations. One must pass both conductors from north to south to create energy. The manner of which all the appointed represent the bobbins of windings that energize a circuit and conduct energy. Called the Delta Field symbolized by the Triangle. When this occurs in session the colors change as they intensify. or become charged by the influence of the other. The Elected (Electrons) remain outside the field and balance the charge, load and use of energy and create a Star Wave energy, symbolized in engineering terms the Star Wave. .

When all stations are charged and emitting energy, Light is generated and in light is information which now can be passed.

As the fields move about Elected/Appointed the center of the filed of generated human energy within the center light energy rotates within the four parts of the circles center causing it to shift North, South, East and West, this shift in electrical generation is called a Quadrature. And is shaped Like a pentagon. This action then causes what is called in engineering profession a Quadrature Field of energy. Where the energy comes from any number of the five frequencies within the core.

The signs, sounds, colors of energy along with proper movements of the body are what makes the memory and synapse of the minds nerotransmitters high performance energy. Rob Morris incorporated this feature as in Masonry does as well. Tai Chi movements of alignment of the body when receiving and transmitting light.

All the five Heroines within the Triangle of energy field use the Tai Chi movements laced into their performance energy when exciting the field in the form of open and closing, and when exemplification for candidates. Which can only be conducted by a conductor.

The Salutation signs. Is an inductive means of closing the loop in human energy with closing of the eyes and a slight bow of the head. As in Tai Chi, one can go from receiving light (information) to Transmitting light. When the optic light is shut off in a human engine, it excites the Pineal Gland and when you bow your head the Pineal gland activates and when hands are properly placed. It goes from receiving thought to transmitting thought. We pray not as a religion but as a group of aligned human energy and when synchronized the thoughts energy is transmitted outward.

FAIREST AMONG THOUSANDS ALTOGETHER LOVELY

While it is said Eastern Star is an Adaptive Masonry and Masonry is Speculative. I disagree it is Operative, and Rob Morris engineered it to be such as a gift of Star Love for generations to follow. I believe, that Rob Morris knew very well not all members will discover this and he was correct in saying Fairest Among Thousands Altogether Lovely.

Meaning, Thousands my become members, but the process may not be attainable by all. But for those who practice and become proficient, will through the process he discovered in human energy, enjoy good health, happiness and will be a guiding light for all. Making them the fairest among the thousands.

The purpose of these pages is to bring awareness to the human mind, body and soul, that is influenced by the fields of energy coming from “Trinity” (GAOTU) and to bring awareness to why the rituals were designed and mimic to a point of, when practiced, one can enjoy the many splendors of health and happiness. The rewards of this and the highest achievement for good health is discovered when we love one another and give rather than receive.

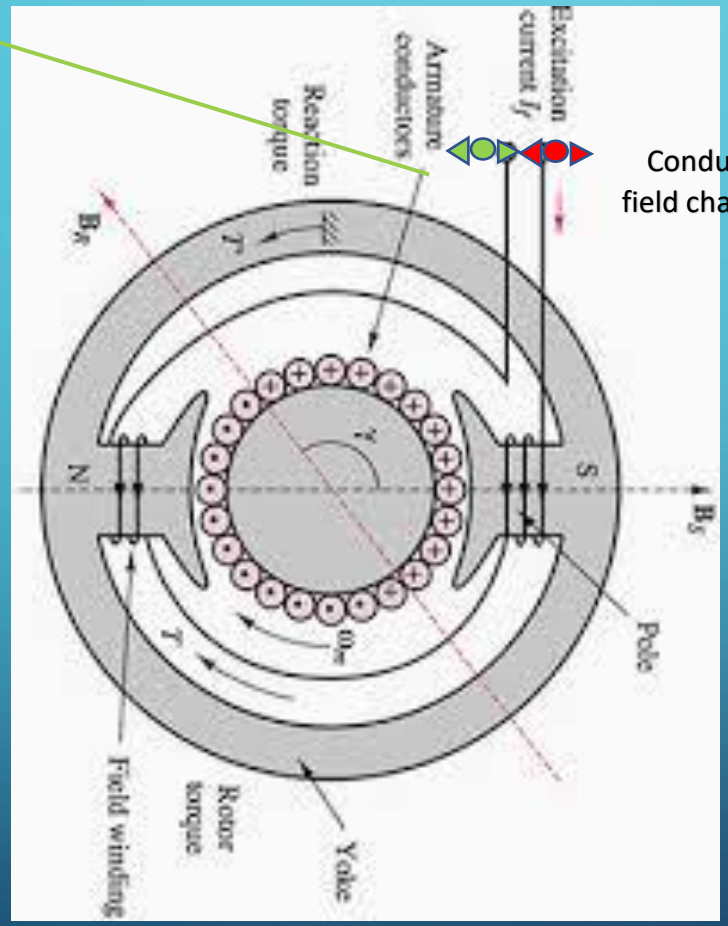

It is also the intent to stress the importance of proper alignment in and during ritualist manners, that when not properly understood or experienced due to the lack of the aforementioned, that chapters will decay and the light will diminish, But, when we can understand that which Rob Morris intended and appreciate its purposes, then and only then, will the human mind grow and flourish.

Then and only then, will all the mysteries become of providence and Chapters will then grow and better will be in the world, outside the Chapter room.

Closing the Chapter

ELECTED AND APPOINTED / Electron and Atoms return to the center and become one

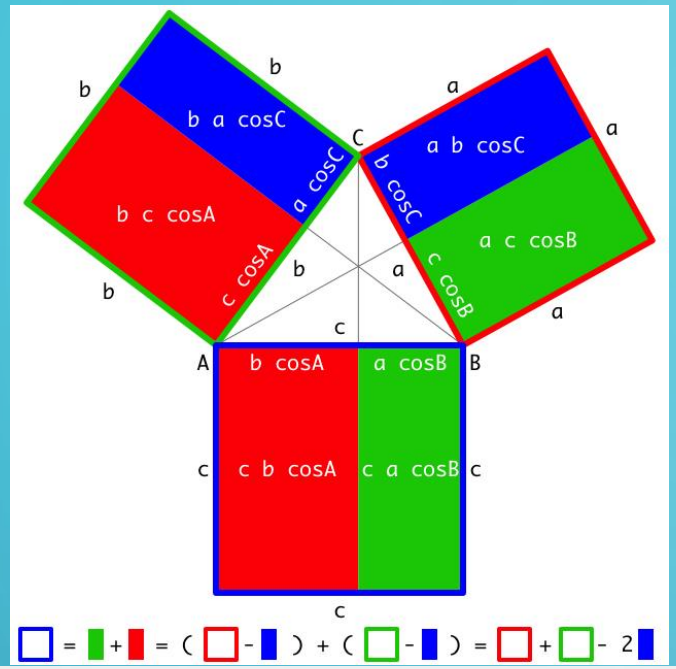

field and the energy production field collaspes, no more energy produced

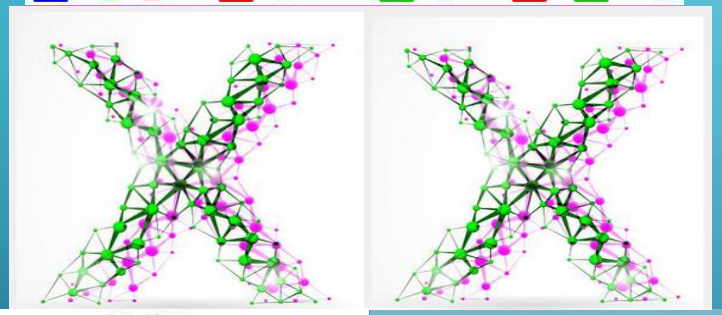

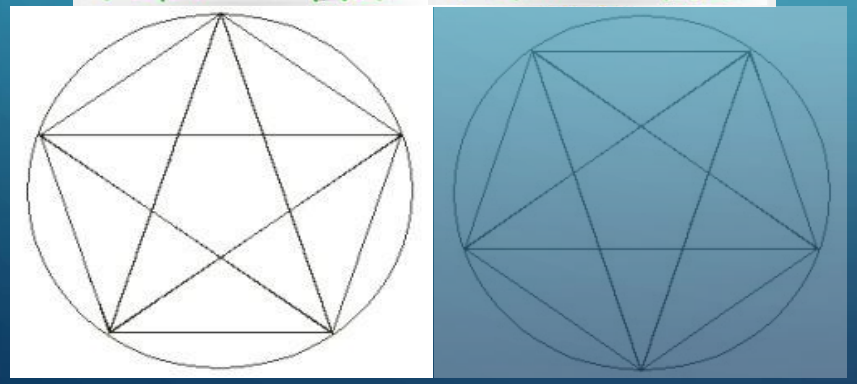

Conductress and Chaplin enter core—
field changes charge from open to closed
