We are all saying the same thing

Languages, Thought consciences pattern and symbols.

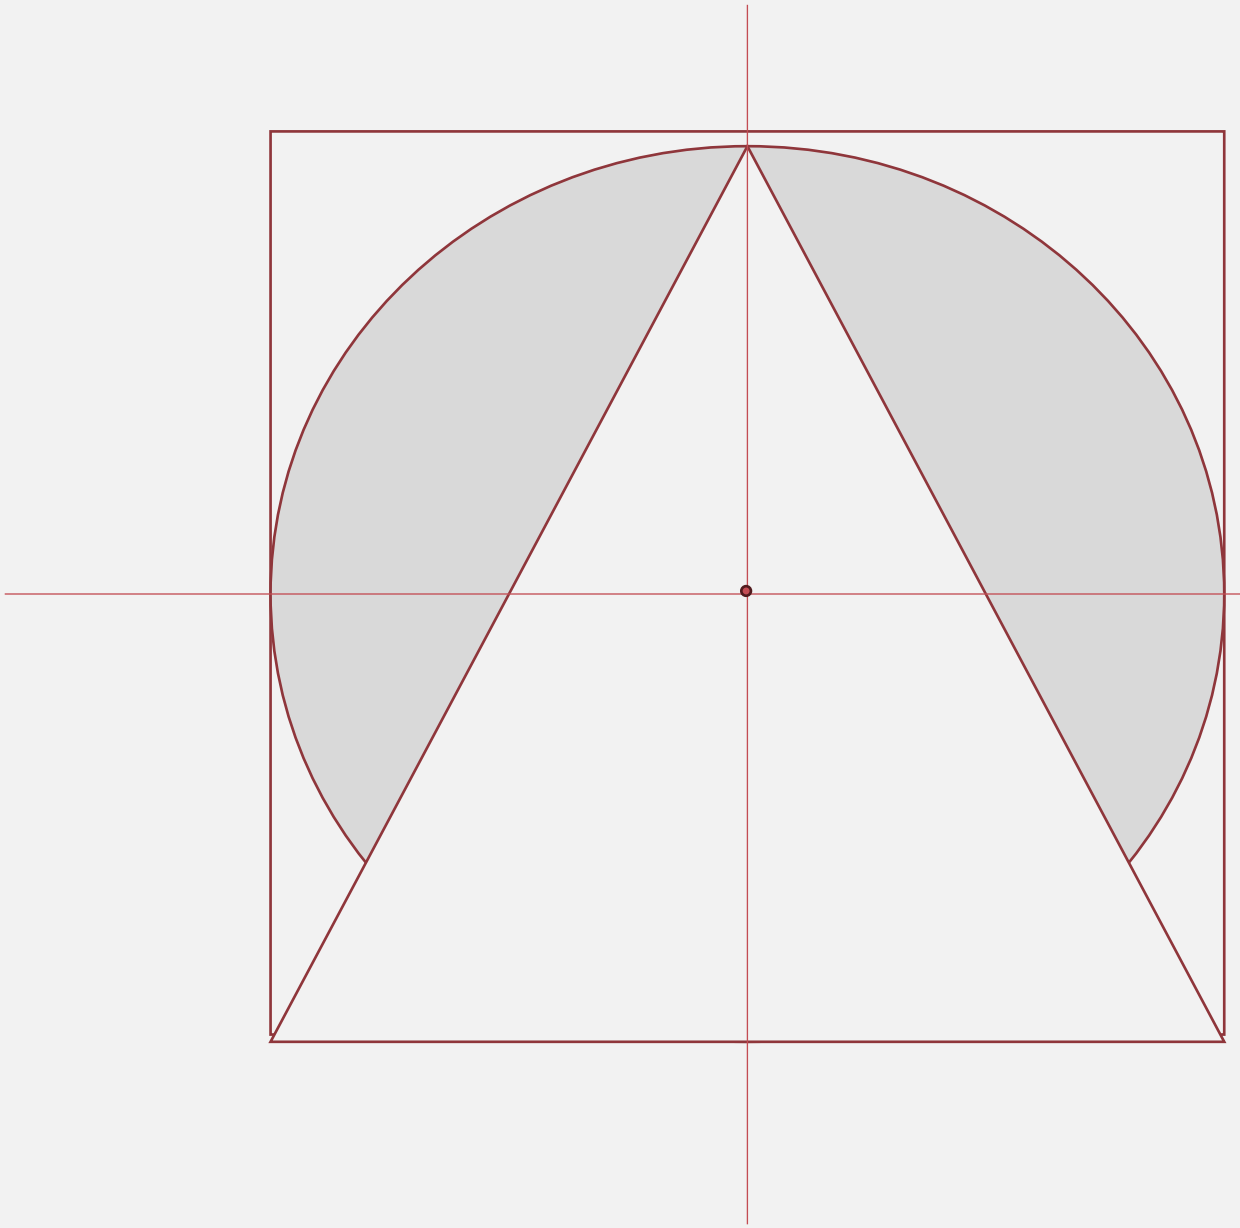

By Jeffrey Starke KCCH

Knights of Light.

Through out the ages Symbols contain volumes of thought

square

a.k.a. 4 parts to a circle

Level

Plumb

Circle

Triangle

DOT

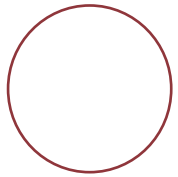

These shapes formed letters by which optic nerves triggering chemical processes could form a packet (reason) applied to physical senses and observances. It is the sacred geometry of the creator

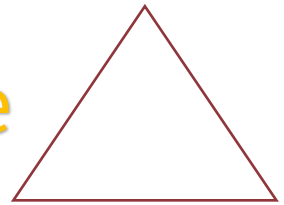

Thus, language is born

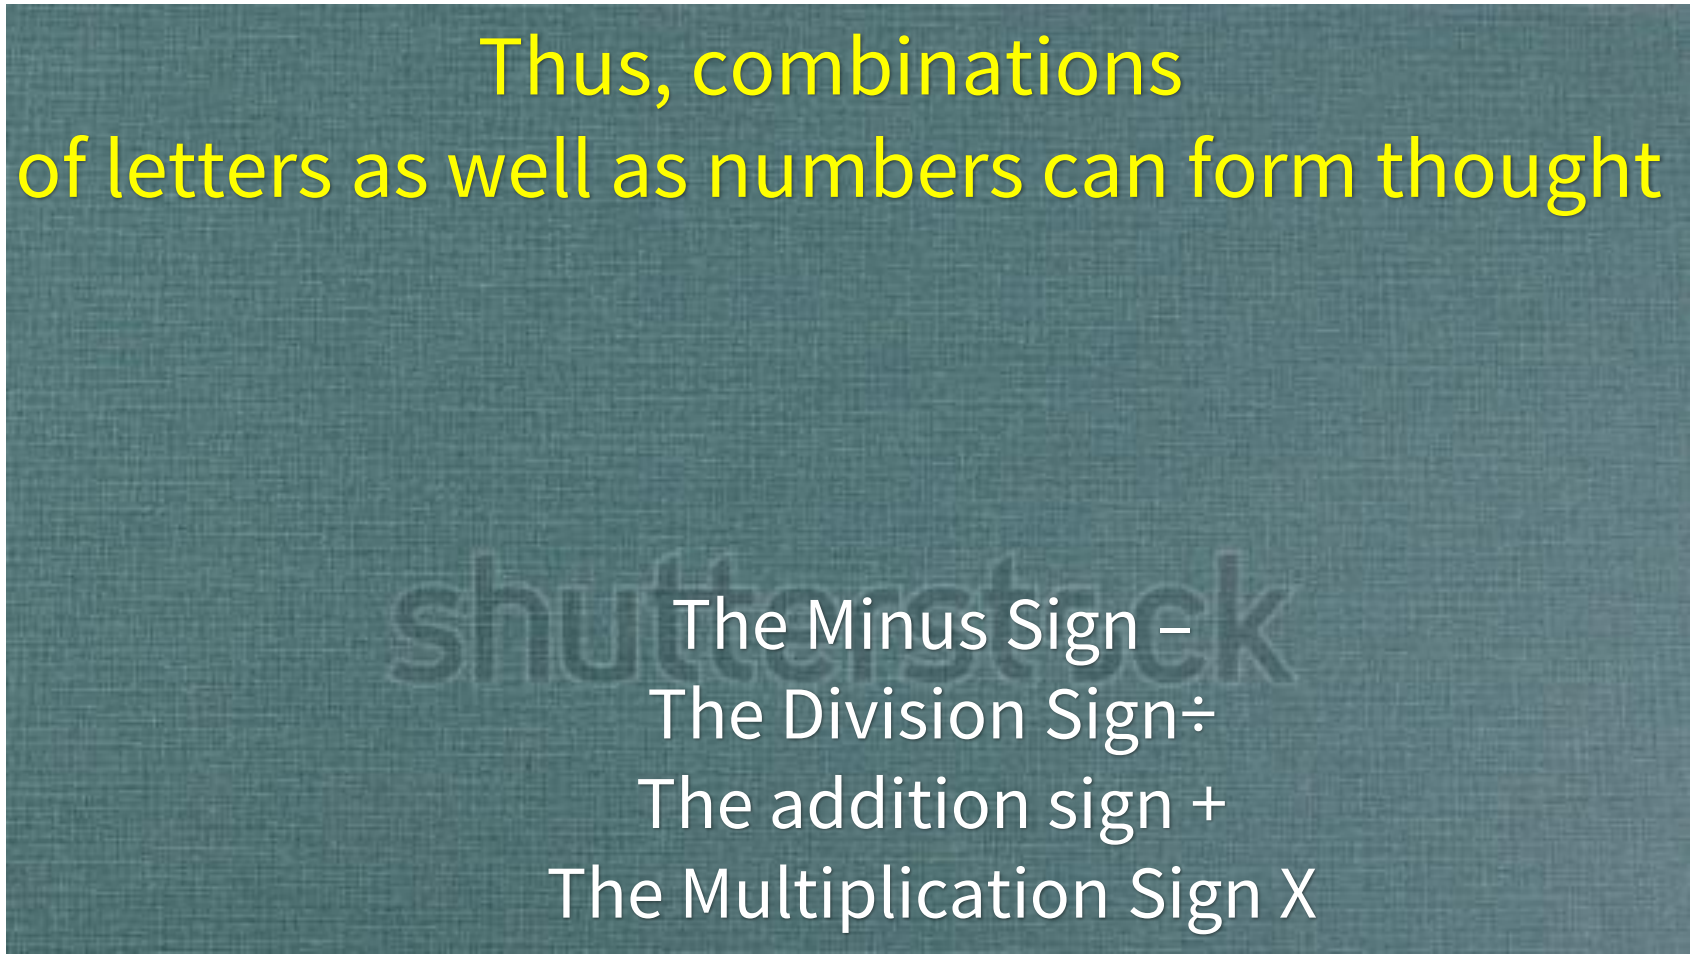

Square — Makes the letters L,T, E, and F

Level — Makes the letters and connections (minus Sign) -

Plumb — Makes the letters I, P,D,R,K,X, Z, H,Y

Circle  Makes the letters O, Q, C, G,B, S, U (circle can be opened or closed)

Triangle  Makes the letters, A, M, N, V, W, Z (triangle can be up or down, open or closed)

There are 72 letters an obviously rare phenomenon. The letters of these three verses can be arranged as 72 Triplets of Letters. But we are taught in Kabbala that if we reverse the order of the letters in the middle set, The 72 Triplets become the 72 names of GOD, 7+2 =9

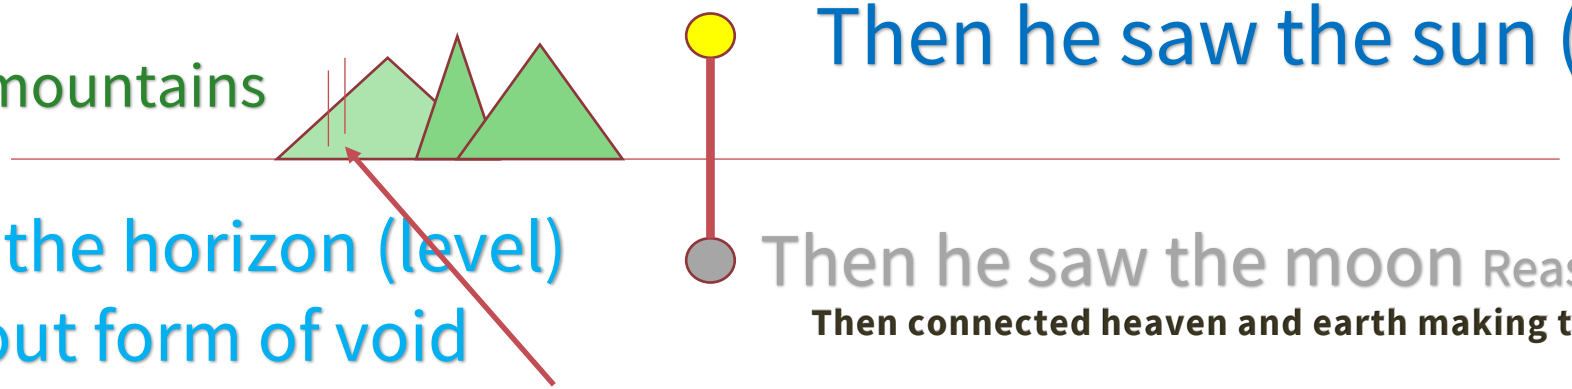

Exodus 14:19-21

But no thought can become real,
understood or designed without sharing
with another, unless there is a standard of reason
One to the other and both can agree.

Communication is born!
FACT is an agreed understanding, F=Finding A= And
C=Communicating T=Truth

Thus, reason manifests Reality

Then notices mountains

Then he saw the sun (dot)

First, man saw the horizon (level)

It was without form of void

Then he saw the moon Reasoned it was divided

Then connected heaven and earth making the plus sign

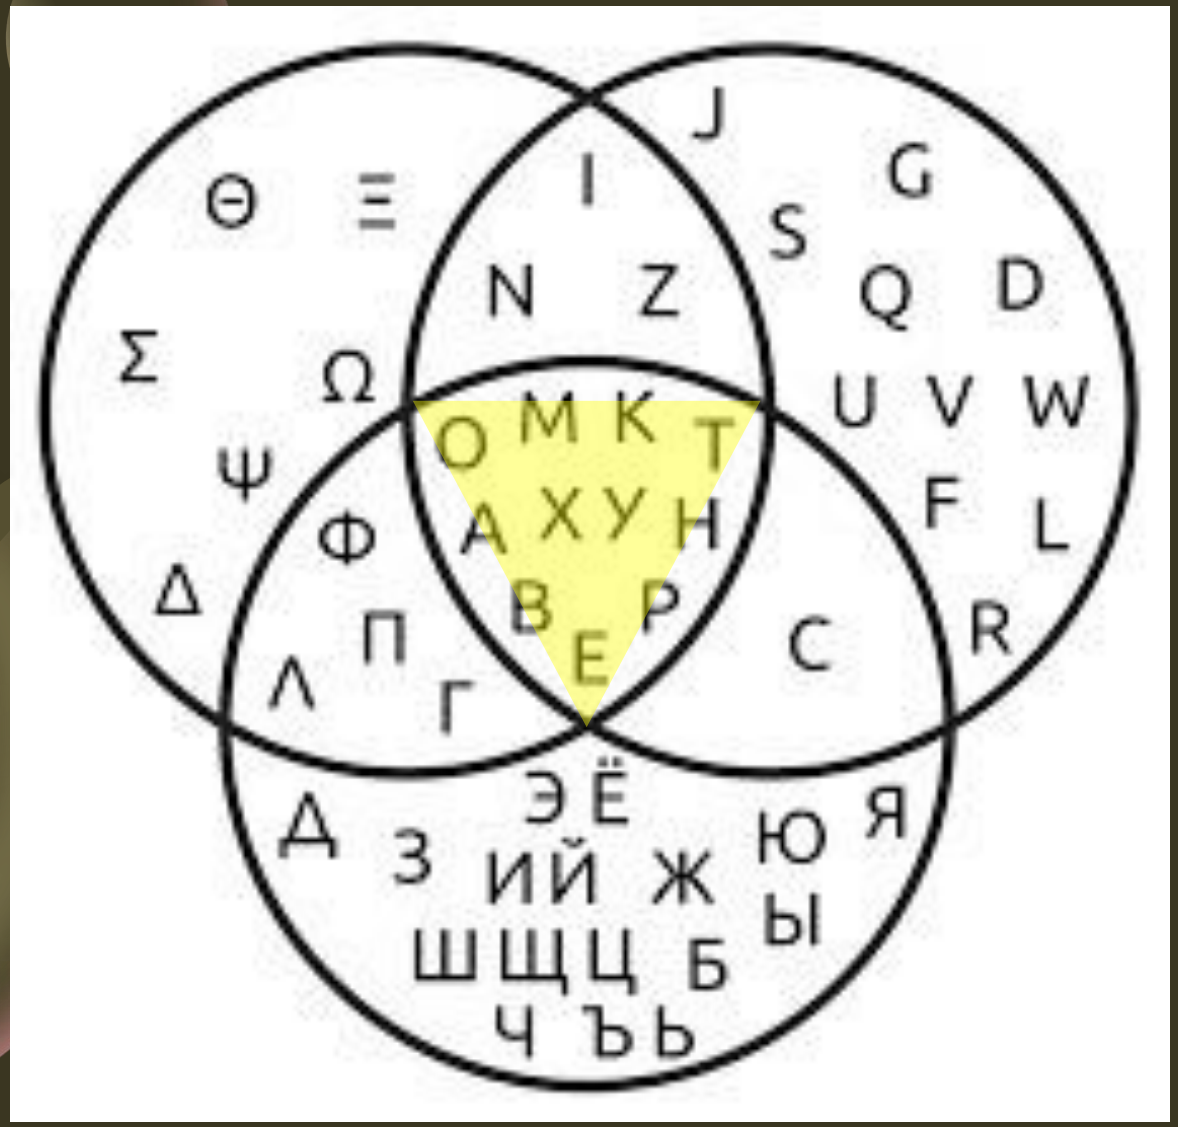

Then discovered the trees grew straight, and the mountain slope accelerated (multiped X) your speed traveling to the level ground.

Done by rotating the plus sign to align to the tree on the slope line

- ÷ X +=

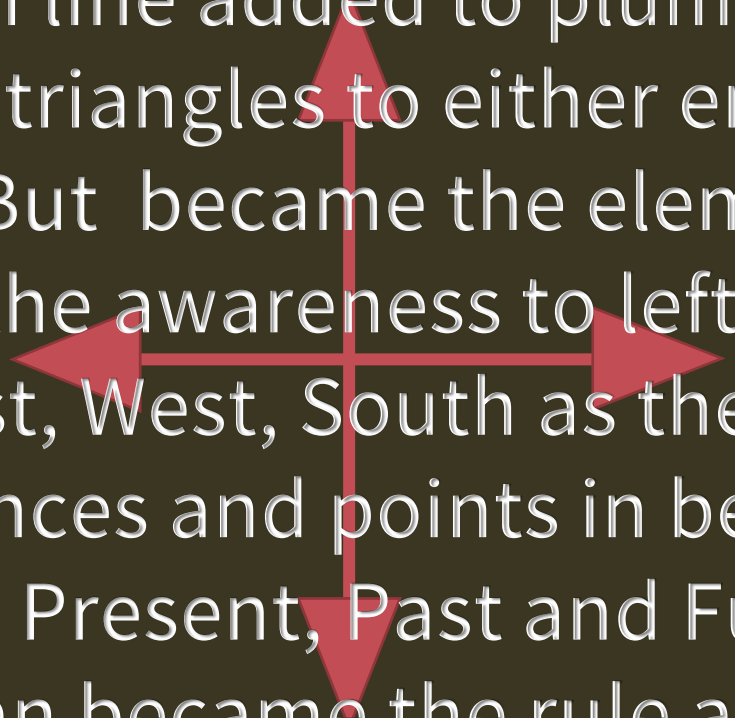

Then reasoned two minus signs would be equal.

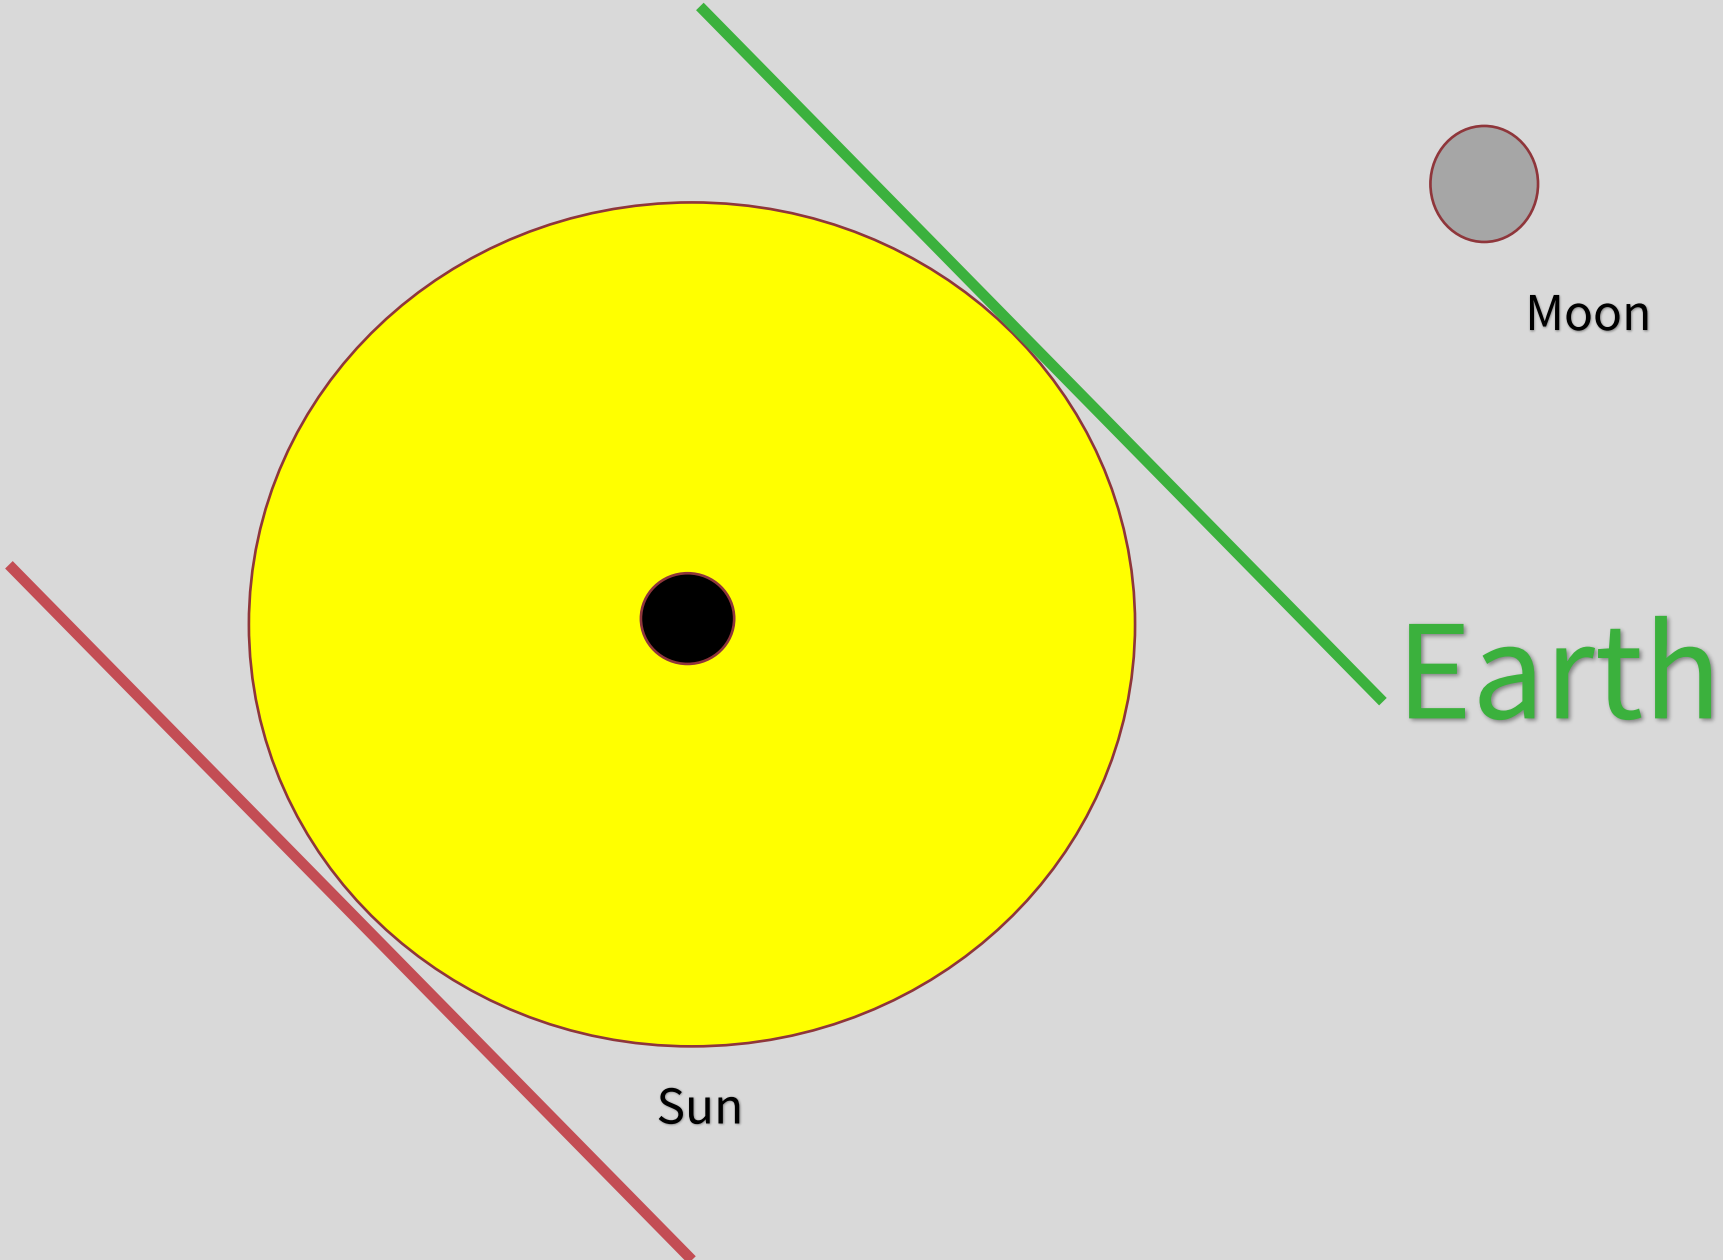

All languages use the same geometric shapes

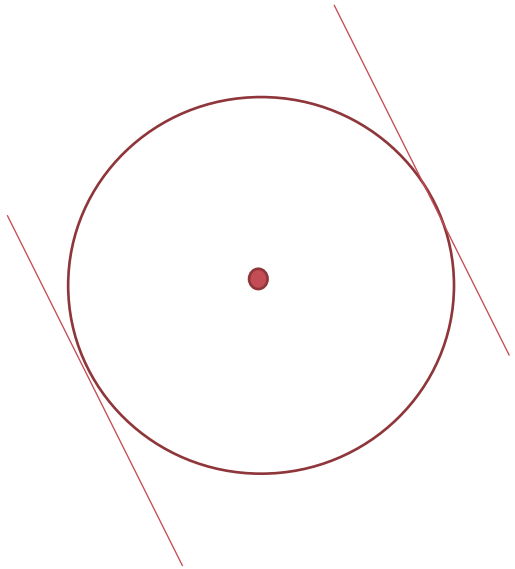

The center, all languages shared the eleven symbols of language The Plumb, the Square, The triangle, the level and circle to make up the optic means for reason within.

Horizon line added to plum line would mean plus.
By adding triangles to either ends, pointed to distances.
But became the element for reason.
Making the awareness to left, right, top, and bottom.
North, East, West, South as the sun's direction instructs.
Making references and points in between of descriptive manner
for Present, Past and Future, more or less
or greater than became the rule and guide. Observed in nature.

Moon
Earth
Sun

What is it with the circle? Lines? And Dot

Winter solstice

25,000 2+5=**7**
6,250 6+2=8+5=13, 1+3=**4**
2,083.33
2+8=10+3=13+3=16+3=19
1+9=**10**
520.8333
5+2=7+8=15+3=18+3=**24**
7+4=11+10=21+24=45 4+5=9
9x4 parts of the circle =36,
3+6=9

The Myan Calendar is overlayed on the sundial oriented the same and has the same geometry of Light. Therefore, all symbols of ancient teachings and calendar synchronize to the light at the center of the galaxy as three as One. 3X3=9 The life building blocks of the universe. Carried on the light.

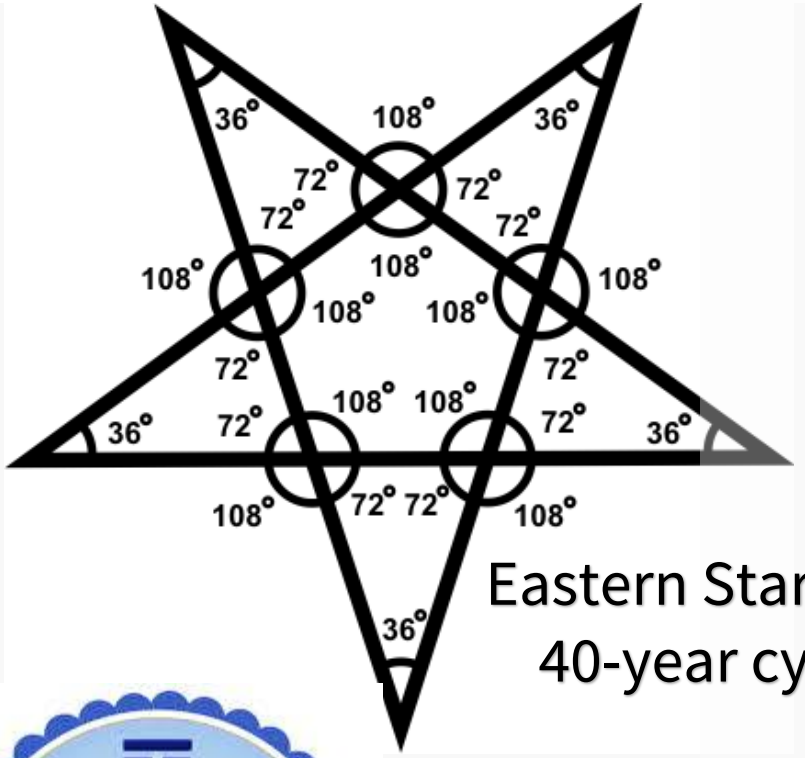

3,6,9 or 4,3,2. When all symbols are overlayed and lined up by the North, South, East, and West Then the GAOTU emitting Light and Geometry form conscience thought.
Here is the image slowed down from 432Hz to see how a particle and wave are one.
Notice however, the 3,6,9 of the square sign and compass orientation switch from
+ to – is really switching from North magi to South Magi.

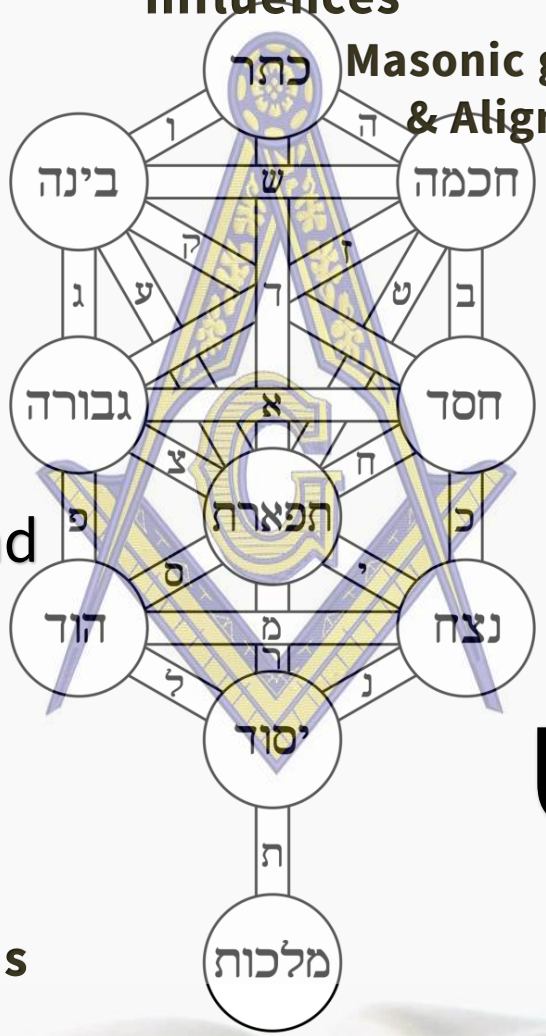

In addition, on the horizontal line (plane), both lines combined equal 9. the sum This energy is also evident in the Kabbalah, Ying and Yang, Masonic Square and Compass, and visually observable in Uriel's Machine, Myan Calendar, and alignment in all ancient Civilizations. Along with The Coral Castle Sun Dial and are now observable as one in the Starkey Sundial.

Uriel's Machine

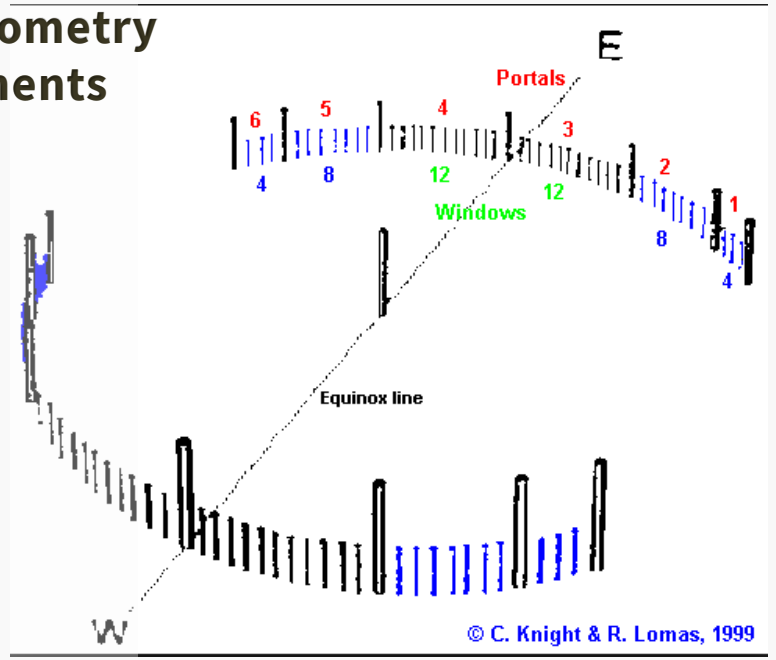

Kabbalah & frequency influences

Eastern Star and 40-year cycle

Masonic geometry & Alignments

Ying & Yang
With binary trigrams

By: Jeffrey Starke

Starke-y Sun Dial. Located within 1 degree of latitude to that of the Great Pyramid of Giza. With angular adjustment to the curvature of the earth at 81 degrees long. (8+1 = 9)
Depicted here, the Ying and Yang overlay with Kabbalah and Ying and Yang binary trigrams. The tunning fork is in the house of the kabbalah when Mars was the inspiring influence at high twelve.
Shown in Uriel's machine on the outer diameter overlayed with the rest of the symbols in harmony to the Equinox and Solstices.
Proving the prime 9 number of the signals harmony to influence matter.

The Starke-Y Sun Dial. Designed by Jeff Starke, is presently still receiving light in the form of the primary 9 the language by which the Trinity makes known to us what it thinks and is. This study and continued overlays of all other symbols in nature proves that we are all saying the same thing and governed by one great law of harmony. Because we are created by these physical vibrations that make up all matter and energy.

This sun dial, includes, the overlay of the Kabbalah (tree of Life Symbol) The Ying and Yang with its Binary Trigrams that establishes the mathematics of the frequency counts. The Masonic lodge layout of the sacred geometry entrusted by the ancients as a rule and guide orientation to the heavens in us as freemasons, combined with the Uriel's Machine which is its timing base of events also measuring the declination of earths tilt from solstice to solstice. While the Myan Calendar substants its accuracy of the heavens and all symbols are depicted and aligned to true magnetic North to South . The finding and confirmation of the language and its means to understand I believe these symbols were purposely separated in culture and terrain for good reason. Today, I brought them together to discover Both the Cosmos (Trinity) and the Earths interplay with our solar system proving Enoch’s knowledge for man.

This sun dial, is the only one of it’s kind and is accurate. It has taken 4 years of being present on each solar equinox, Solstices. To substantiate accuracy and is still work in progress.

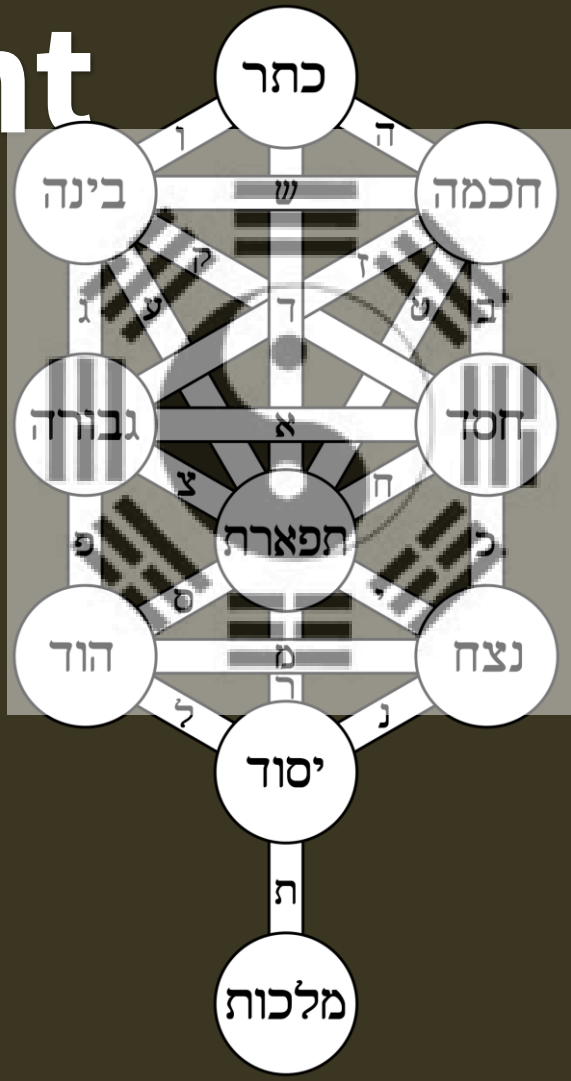

When completed the final design will allow anyone with the understanding of heaven and earth, to verify our origins and reality of truth.   Proven by the separation of darkness and light coming from trinity. The three as one.
I Have discovered in this sun dial, that observing the path of our sun and its frequencies, that the Kabbalah in the same orientation the tuning forks laid shadows during the Equinox and Solstices, that the position of the Planets emendates exactly to the colors of radio waves as does the Myan Calendar.

Note* when the Ying and Yang symbol interact with the alignment of Kabbalah, at 432hz the abyss line is discovered above Darth. As we look at the Kabbalah, we see it static, but it is moving at the speed of Light. 186,300 miles per sec. and equals 9 when you stream light

Proof in Light

Pi=3.141 or 3+1+4+1 = 9

3.141X3 =9.423’

9+4=13+2=15+3=18 1+8 =9

Taken from “Book of Creation” by Jeff Starke

Here is the overall symbol of life that
great luminary from the center of our galaxy.

Remember that the rotation along with the movement of the influencing bodies that the symbol is dynamic not static. And that once they reach 432 hz that harmony prevails and rotation begins thus building in water, forming life (DNA) when the right magnetic fields and positions geographically will be manifest with what elements are in the water
created the adaptations of skin color, eye shapes, hair textures etc. Plant and animal life.
